

**\*\*\*DO NOT CONNECT THE KIT'S BLUE WIRE TO THE JB4'S EXTERNAL 12V WIRE IF YOUR SETUP HAS ONE\*\*\***

Attach the wires as shown in the image below and attach the kit's DB9 connector to the JB4.

To install the BMS DATA Cable or REV3 BlueTooth Adapter

- 1) Remove the gray shell on the cable/REV3 including the metal stopper if installed on the wire
- 2) Open the JB4 enclosure
- 3) Using two short screws recycled from the gray shell, or included with the JB4, attach to the port as shown
- 4) Close the JB4 enclosure ensuring its properly aligned and closes smoothly

If you have one of the newer JB4 wire looms or just want a more concealed install, install your red wire as shown below.

5V (Blue wire) goes here. Attach it to either one of the red wires in the JB4's wire loom.
