RS7 Ziza LED Interior Light Kit

A Non-Marring Trim Tool Kit is available from ECS Tuning. ES#2500877

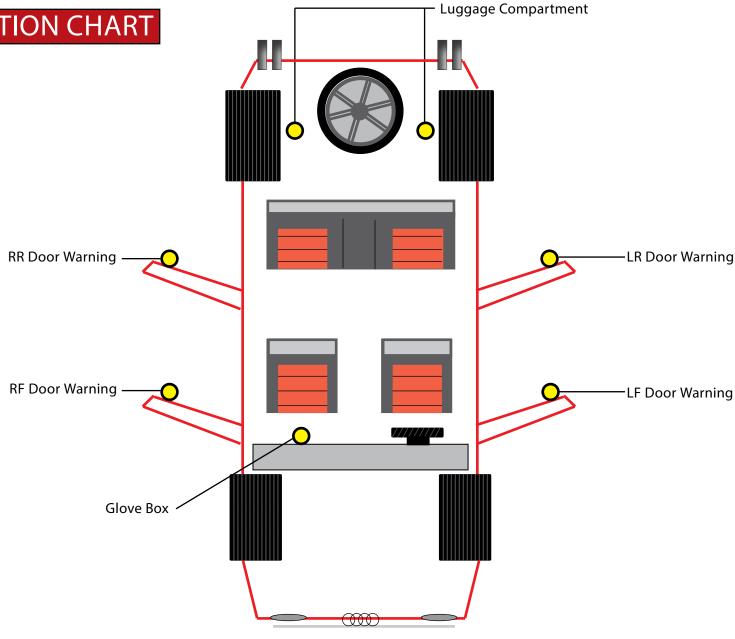

Required Tools

AUDI RS7 LED LOCATION CHART

You will be replacing the OE incandescent bulbs indicated here with the LED bulbs in your kit.

All seven bulbs are replaced in exactly the same manner, making them a breeze to install.

INSTALLATION NOTES

- RH refers to the passenger side of the vehicle.
- LH refers to the driver side of the vehicle.
- Always use the proper torque specifications.
- If applicable to this installation, torque specifications will be listed throughout the document and at the end as well.
- Please read all of these instructions and familiarize yourself with the complete process before you begin.

GENERAL PREPARATION AND SAFETY INFORMATION

ECS Tuning cares about your health and safety. Please read the following safety information. This information pertains to automotive service in general, and while it may not pertain to every job you do, please remember and share these important safety tips.

- Park your car in a safe, well lit, level area.
- Shut the engine off and remove the key from the ignition switch.
- Make sure any remote start devices are properly disabled.
- Always wear safety glasses.
- Make sure the parking brake is applied until the vehicle is safely lifted and supported.
- If using an automotive lift, be sure and utilize the factory specified lift points. Lifting a vehicle in an incorrect location can cause damage to the suspension/running gear.
- When lifting a vehicle using a jack, always utilize the factory specified lift points. Lifting a vehicle in an incorrect location can cause damage to the suspension/running gear. Always support the vehicle with jack stands.
- Always read and follow all safety information and warnings for the equipment you are using.

Never get underneath a vehicle that is supported only by a jack. Always make sure that the vehicle is securely supported on jack stands.

Step 1:

Inspect the lenses. Each one has a small cutout on one end to allow for insertion of a removal tool.

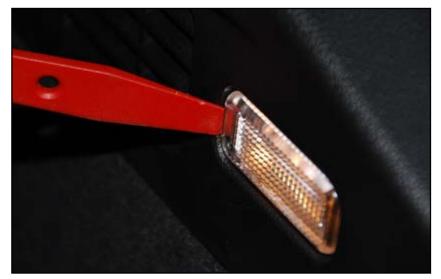

- In the luggage compartment the cutouts are at the front.
- On the doors, the cutouts are on the top.
- In the glovebox, the cutout is on the left.

The picture on the right shows a closeup of the small cutout. They can also be seen easily by simply looking at the lens.

Step 2:

Begin with either the doors or the luggage compartment. (The glove box lamp is difficult to see and replacing the others first will allow you to do it by "feel"). Insert a non-marring trim tool into the cutout on the end of the lens you have chosen to begin with and gently pry it outwards. The complete lamp housing will easily pop out.

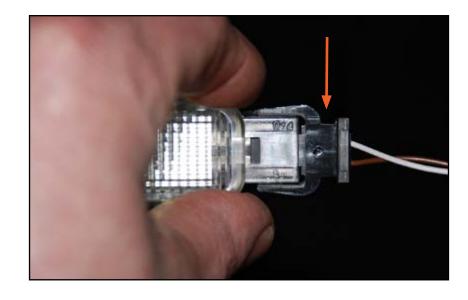

1.800.924.5172 WWW.ECSTUNING.COM ECS TUNING 1000 SEVILLE RD. WADSWORTH, OH 44281

Step 3:

Disconnect the electrical connector (arrow) from the housing. Grasp the connector and wiggle slightly as you pull for easy removal.

Step 4:

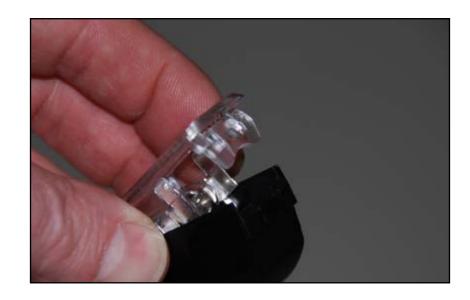

Using the same non marring trim tool, gently pry between the housing and the tab on the end of the lens.

Step 5:

Lift the lens off the housing.

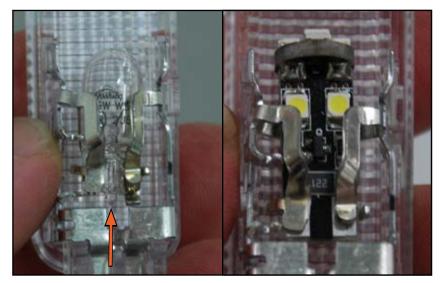

Step 6:

Pull the original bulb out of it's socket and insert the new LED bulb in it's place. If you can not grasp the original bulb with your fingers, you may have to use a small screwdriver to push the bulb out from the bottom (arrow).

CAUTION

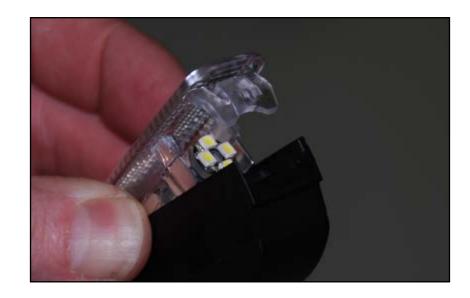

The bulb may be hot and can cause burns. Be sure to let it cool before removing.

Step 7:

Re-install the lens onto the housing.

Step 8:

Plug the lamp back in and re-install it into place.

NOTE

These LED bulbs are polarity specific. If they do not work when you plug them in, remove the bulb, flip it over, and re-install it.

Step 9:

Replace the remaining luggage compartment and door bulbs in the same manner. This pictures shows the removal of one of the door lamps.

Step 10:

Install an LED bulb in the glove box lamp. It is difficult to see but can be easily removed in the same manner as the other lamps.

Your Audi RS7 Ziza LED interior light installation is complete!
