

# Audi B8 A4/S4 Carbon Fiber Engine Bay Cover

## Installation Instructions - [ES3570283](#)/[ES3570284](#)

**Thank you for purchasing your new ECS Tuning Carbon Fiber Engine Bay Cover we appreciate your business!**

### Intricately Designed:

- Our engine bay cover is designed to cover the unsightly ABS module, power steering reservoir and other exposed wires and hoses.

### Sleek Finish:

- Our engine bay covers are constructed of gorgeous hand laid carbon fiber and features a clean durable gloss coat finish.

### Easy Installation:

- Our engine bay cover kit clips onto an A/C line and a brake line for a simple and clean installation.

### Complete Kit

- Each kit includes two pipe clips, a stud and a grommet

### Vibration Resistant:

- Our engine bay cover uses a rubber grommet and stud to keep the cover in place preventing movement and vibration.

## Section 1: Installing the Engine Bay Cover

- Step #1**
- Install the rubber grommet into the hole in the side of the cover.
  - Install the larger pipe clip into the hole closest to the front of the cover.
  - Install the smaller pipe clip into the hole closest to the center of the cover.
- Step #2**
- Install the provided stud into the front-most hole on the LH side of the chassis.
- Step #3**
- Route the cover into place, ensuring that the stud slides into the grommet we installed.
- Step #4**
- Pivot the cover downward, ensure that the smaller pipe clip pops on to the brake line and the larger clip pops onto the AC line.

***Congratulations, your installation is complete!***
