

READ BEFORE USING WHEEL RAMPS OR STANDS

- **DO NOT** exceed weight rating per ramp capacity.
- The use of ramps is an inherently dangerous activity. **FAILURE** to follow proper procedures can result in serious injury or death.
- **DO NOT ALTER** these ramps. These ramps cannot be cut down, shaved, or modified in any way.
- **USE ONLY** on a level, relatively even surface. Remove all hard objects such as pebbles or stones, as they can act like marbles when on a hard surface and **ARE NOT** an optimal surface. Dirt, grass, and sand are acceptable.
- Place ramps in line with either the front or rear tires. Use a tape measure to ensure they are spaced equally from each other. As you drive up the ramps you **MUST** stay centered on them, **WHEELS POINTED STRAIGHT AHEAD. DO NOT RIDE THE EDGE.**
- **DO NOT** use other materials such as wood or metal in conjunction with the ramps. This includes using jacks or other lifting devices on the surface of the ramps.
- **ONLY** use optional accessories that have been provided specifically for the product.
- **DO NOT** disconnect brakes, engine, transmission components, drivetrain, drive shaft, universal joints, or wheels without properly bracing and stabilizing the vehicle to ensure that it **CANNOT MOVE.**
- Another person, standing clear from the vehicle's path, should observe and guide the vehicle operator when ascending and descending the ramps.
- When tires touch the front stop are of ramps, **PLACE VEHICLE IN PARK** (or in reverse gear with the engine off for manual transmissions). **SET EMERGENCY BRAKE AND CHOCK TIRES.**
- **NEVER ACCELERATE OR BRAKE SUDDENLY.** Proceed slowly and cautiously, in one fluid motion.
- Once the vehicle reaches the top of the ramps, apply brakes to prevent traveling to far.
- **BEFORE** starting work on your vehicle, **BE SURE BOTH TIRES** are properly positioned on the ramps' support platform. Shake vehicle sideways and endways to be sure vehicle and ramps are stable. **CHOCK TIRES.**
- Any lack of adherence to the above stated warnings can result in the voiding of the warranty, vehicular damage, and/or serious personal injury.
- These ramps shall be maintained in accordance with these warnings. It is recommended that these be inspected before and after each use.
